HOSPITABLE kicks off European collaboration for safer healthcare

Held on 21 October 2026, the HOSPITABLE kick-off meeting marked the **successful start of fruitful discussions among partners** and launched a collaborative European effort to strengthen the cybersecurity, resilience, and business continuity of hospitals and healthcare providers across Europe.

Over the coming months, Consortium partners will validate its solutions through three pilot sites in Greece, Italy, and Spain, representing diverse healthcare environments, infrastructures, and levels of cybersecurity maturity. These pilot deployments will demonstrate practical, scalable, and cost-effective approaches to strengthening cyber resilience across European healthcare systems.

As agreed during the kick-off meeting, the **HOSPITABLE consortium will convene in Athens, Greece, on 15 December 2026** for its **1st Plenary Meeting** to review progress achieved to date, discuss forthcoming activities, and define the next steps for project implementation.

What is HOSPITABLE Why it matters

Introducing the HOSPITABLE project contributing to patient safety and continuity of care

HOSPITABLE is a new European project dedicated to strengthening the cybersecurity, resilience, and business continuity of hospitals and healthcare providers across Europe through the deployment of a modular, interoperable, and scalable **platform**.

As healthcare organisations across Europe face increasing cyber threats, including ransomware attacks, data breaches, and supply chain vulnerabilities, the need for stronger cybersecurity and operational resilience has never been greater. In response, HOSPITABLE was officially launched on 1 June 2026 to develop a modular, interoperable, and scalable cybersecurity platform designed to strengthen the security and continuity of hospitals and healthcare providers.

HOSPITABLE project *(Holistic Secure Platform for Intelligent Threat Awareness and Business-continuity in Trusted Adaptive HEalthcare environments)* is a two-year initiative running until May 2028.

Explore our HOSPITABLE introductory presentation

Coordinated by UNISYSTEMS Luxembourg SARL, the project brings together a multi-disciplinary consortium of 12 organisations from seven European countries to address the growing cybersecurity challenges facing the healthcare sector.

"***HOSPITABLE represents an important step towards a safer and more resilient European healthcare sector.*** *Working closely with our three pilot hospitals in Italy, Spain and Greece, we will validate mature, high-TRL cybersecurity technologies in real hospital settings. By the end of the project, we will deliver a ready-to-use solution, for hospitals across Europe, that protects patients and critical healthcare infrastructures*" said Angelina Broukou, Project Coordinator at UNISYSTEMS Luxembourg SARL.

The project is co-funded by the European Union under the **Digital Europe Programme (DIGITAL)** through the **European Cybersecurity Competence Centre (ECCC)**, HOSPITABLE has a total budget of €7.94 million and an EU contribution of €3.97 million.

OUR PLATFORM

5 capabilities, 1 operational view

Over the coming months, HOSPITABLE will deliver an integrated, modular and healthcare-specific cybersecurity platform, that bridges EU policy requirements and hospitals' operational capabilities.

It will be **validated in three pilots** covering different healthcare realities: oncology workflows, clinical IT/OT and connected devices at Fondazione Policlinico Universitario Agostino Gemelli IRCCS (**Italy**); a hybrid oncology and research data ecosystem at Hospital Universitario Puerta de Hierro Majadahonda (SERMAS (**Spain**); and administrative and billing services handling sensitive data at Papageorgiou General Hospital (**Greece**).

At the core of the platform is an AI-powered Security Operations Centre (SOC) incorporating advanced SIEM and SOAR capabilities for real-time threat detection, automated incident response, and forensic logging.

Additional components include a Privacy and Compliance Centre supporting GDPR, NIS2, EHDS, and AI Act requirements, a Zero-Trust Identity Management Framework, a Training and Awareness Centre with role-based and gamified cybersecurity exercises, and risk and cost assessment tools supporting evidence-based cybersecurity investments.

Discover our platform

Technology | Compliance | People | Investment

01 AI -POWERED SOC

Real-time monitoring, detection and automated response, with zero-trust IAM bult in

02 PRIVACY & COMPLIANCE

Readiness for GDPR, NIS2, the EHDS and AI Act, with automated checks and audit trails

03 INTERACTION CENTRE

MediAssist Advisor and InsightBoard 360 turn platform signals into role-specific guidance

04 TRAINING & AWARENESS

Adaptive, gamified, and role-specific learning for clinical and non-clinical staff

05 RISK & COST TOOLS

Evidence-based investment and resilience planning with risk, TCO and RoSI dashboards

Modular by design: Hospitals adopt the most relevant capabilities first & expand as their maturity grows.

Securing & sustaining Europe's healthcare future

Ensuring trust, continuity, and care

Our vision is to transform European hospitals and healthcare providers into digitally resilient environments where cybersecurity is seamlessly embedded into daily operations.

By combining AI-enhanced SOC capabilities, zero-trust identity management, and adaptive staff training, it ensures both technological robustness and human readiness.

The platform aspires to protect sensitive health data, safeguard patient trust, and guarantee service continuity even under cyber crisis conditions.

Ultimately, HOSPITABLE envisions a healthcare ecosystem where security is not a burden but a trusted enabler of innovation and care delivery.

*Visit our website and discover how HOSPITABLE's **10 strategic objectives** are transforming cybersecurity into tangible benefits for hospitals, healthcare professionals, and patients across Europe.*

Our mission

Protecting patient trust in the Digital Age
Ensuring secure healthcare services, safeguarding sensitive medical data, and supporting uninterrupted patient care.

European innovation for a more resilient healthcare sector
Leveraging European technologies and open standards to strengthen digital sovereignty and cybersecurity resilience.

Cybersecurity solutions that work in real hospitals
Deploying mature, ready-to-use tools that deliver practical, scalable, and sustainable protection.

Safer healthcare for citizens across Europe
Supporting patient safety, resilient healthcare infrastructures, and higher-quality healthcare services.

EXPO - EVENT

#TIF2026 - HOSPITABLE showcased at the 90th Thessaloniki International Fair

5-13 Sept. 2026
Thessaloniki, Greece

HOSPITABLE was among the flagship European cybersecurity projects showcased by the National Cybersecurity Authority of Greece (NCSA) during its participation in the 90th Thessaloniki International Fair (TIF), held in Thessaloniki, Greece, from 5 to 13 September 2026.

The project was presented at the NCSA booth in Pavilion #12 of the Hellenic Ministry of Digital Governance and Artificial Intelligence, promoting its objectives and expected contribution to strengthening the cybersecurity, resilience, and business continuity of hospitals and healthcare providers across Europe. The exhibition attracted hundreds of visitors from the public sector, industry, academia, and civil society, providing a valuable opportunity to increase the visibility of the project and raise awareness of the growing importance of cybersecurity in the healthcare sector.

A dedicated video presentation introduced HOSPITABLE, presenting its vision and expected impact in supporting safer and more resilient healthcare systems through enhanced cybersecurity capabilities, protection of sensitive health data, and improved preparedness against evolving cyber threats.

WORKSHOP

Linköping, Sweden
24-27 Aug. 2026

HOSPITABLE showcased at IWAPS

InQbit Innovations, a HOSPITABLE partner, co-organised the **International Workshop on Advances in Security and Privacy Technologies and Solutions (IWAPS),** held in August in Sweden in conjunction with the prestigious **ARES Conference** (International Conference on Availability, Reliability and Security).

Alongside an outstanding programme of scientific paper presentations, the workshop served as a platform for showcasing cutting-edge European research and innovation. Among the key EU-funded projects presented, **HOSPITABLE was one of the first initiatives showcased**, highlighting its objectives and expected impact on strengthening cyber resilience in the European healthcare sector.

The workshop provided valuable visibility for the project within the international cybersecurity research and innovation community and fostered exchanges with experts and stakeholders from across Europe.
